Peninsula (UK&I) Risk Assessment

Peninsula (UK&I) has taken steps to ensure it's managing the risk of Covid-19 across the business. We have:

1. Continue to engage with all of our employees currently working from home including those in the higher risk category.

2. Continue to implement controls for a safer workplace for employees.

3. Safe operating procedures in place for any employee displaying or experiencing symptoms.

4. Additional PPE provided for employees where required.

5. Implemented increased hygiene controls measures.

6. Safe operating procedures for field based employees visiting clients premises.

7. Update employees as we make changes to our working practices on sites, through information and training.

8. Communicated all of the requirements to our employees.

9. Utilize virtual software to reduce risk of face to face contact, where applicable.

10. Continued to support our employees' health & wellbeing through regular communication and access to our award winning Employee Assistance Program (EAP).

We will continually review our COVID secure risk assessments and safe operating procedures on Covid-19 to ensure they reflect our commitment to our workforce and current government guidance.
